

DO YOU HAVE A 3-6 YEAR OLD?  
WOULD YOU LIKE TO PARTICIPATE IN  
RESEARCH?

The Infant Psychiatry Clinic at the BC's Children's Hospital is looking for mothers or caregivers of 3-6 year old children to participate in a study that looks at self-regulation in young boys and girls.

The study involves observing children with their caregivers in a variety of play tasks. These tasks are designed to find out children's ability to control impulses, compliance and problem solving strategies. Participating children will be offered a treatment plan depending on clinical presentation.

If you are interested, please call us at 604-875-2206 and we will provide you with more information about the study and what it involves.

If your child is selected there is a 2 hr time commitment.

This research is being conducted by Dr. Reebye, Clinical director of the Infant Psychiatry Clinic at BC's Children's Hospital.

All information is kept confidential

This study has received ethics approval from the Behavioral ethics board of UBC, Children's and Women's Research Review Committee.
